

Queensferry High St Refurbishment - £1m Investment

*Ironside Farrar Ltd have been appointed by The City of Edinburgh Council to undertake design & consultation work for Queensferry High Street Public Realm. Following their appointment they have commissioned a topographic survey by Aspect Surveys which will record all existing surfacing information and site levels and will provide a vital tool in the development of future streetscape works. The survey will be undertaken the week commencing **19th March** so you are likely to see surveyors out in the High Street with GPS equipment.*

Further information will follow shortly regarding proposed consultation events to enable you to get involved and let the Design Team know your thoughts about key issues and considerations in taking streetscape works in the High Street forward.
